

AMENDMENTS

*The following is a complete set of the claims, with the status of each claim as noted:*

1. (currently amended) An adhesive composition comprising a polyurea-based polymer and less than about 45 parts by weight tackifier per hundred parts by weight polyurea-based polymer, wherein the polyurea-based polymer is silicone-free essentially free of segments derived from polysiloxane polyamines and the composition is a pressure sensitive adhesive.
2. (original) The composition of claim 1, further comprising a tackifier.
3. (original) The composition of claim 2, wherein the composition comprises up to about 45 parts by weight tackifier per hundred parts by weight polyurea-based polymer.
4. (currently cancelled)
5. (previously amended) The composition of claim 1, wherein the polyurea-based polymer comprises a segmented copolymer, which copolymer comprises repeating units of Formula I:

wherein:

- each B is independently a polyvalent radical;
- each D is independently selected from the group consisting of hydrogen, an alkyl group, a cycloalkyl group, a phenyl group, a group that completes a ring structure that includes B to form a heterocycle, and mixtures thereof;
